Detailed Office Action

Status of the Claims

Acknowledgment is hereby made of receipt and entry of the communication filed 19 November, 2007. Claims 3 and 5-11 are pending in the instant application.

37 C.F.R. § 1.821-1.825

Applicants have complied with the requirements under 37 C.F.R. § 1.821-1.825.

Claim Objections

The previous objection to claims 3 and 5-11 because of the noted informalities has been withdrawn. However, the claims are now objected to for including a figure reference (e.g., Figure 3). Applicants are reminded that where possible, claims are to be complete in themselves. Incorporation by reference to a specific figure or table "is permitted only in exceptional circumstances where there is no practical way to define the invention in words and where it is more concise to incorporate by reference than duplicating a drawing or table into the claim. Incorporation by reference is a necessity doctrine, not for applicant's convenience. *Ex parte Fressola*, 27 U.S.P.Q.2d 1608, 1609 (Bd. Pat. App. & Inter. 1993) (citations omitted). See M.P.E.P. § 2173.05(s). Appropriate correction is required (i.e., A nucleic acid construct comprising a mutant simian immunodeficiency virus (SIV) gag gene comprising SEQ ID NO.:4).

35 U.S.C. § 112, Second Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The previous rejection of claims 3 and 5-11 under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, is hereby withdrawn in response to applicants' amendment.

35 U.S.C. § 101

The following is a quotation of 35 U.S.C. § 101 which reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

The previous rejection of claims 6-8 under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter, is hereby withdrawn in response to applicants' amendment.
